

# Basic Iced Coffee

You will need:

- 12 ounces course-ground coffee (ground at home or your grocery store)
- Filtered or store-bought drinking water
- A gallon-sized container
- Large liquid measuring cup
- A large pitcher
- A strainer
- Cheesecloth

- 1) Dump the coffee into the gallon-sized container and add 10 cups of filtered water.
- 2) Cover container and refrigerate 12-24 hours.
- 3) Place cheesecloth in the strainer over the pitcher and strain your coffee a bit at a time. Keep iced coffee refrigerated.

\*add water or milk to dilute and creamer to sweetened as desired.
